

X-keys XK-12 Joystick

The XK-12 Joystick offers twelve user definable keys with an integrated joystick fit in a small footprint equally suitable for desktop, mounted, or hand-held operation. The full travel keys have the same feel as a standard keyboard and angled feet give the unit a slight tilt for better viewing of the key legends. Blue and red addressable backlighting enhances key identification in low light environments.

Wired USB connection

- A versatile control solution for any computer application
- Precision three axis USB joystick (twist for Z)
- Great for handheld, desktop, or mounted use
- Includes software for Windows and OS X
- Free software development kits and code samples
- Emulates Keyboard, Mouse, Game Controller, and Media commands

MSRP: \$199.95
